

A Whole New Way to Look at Walls

When you dream of building or remodeling your home, walls may be the last thing on your mind. But walls and what they're made of are important – and they're not all the same. National Gypsum's PURPLE® family of products provides unparalleled resistance to mold, moisture, scratches and dents, and can even reduce the noise you hear between rooms. They're naturally fire resistant, GREENGUARD Indoor Air Quality Certified®, as easy to install and finish as standard drywall and are made in the USA. So be sure to ask for PURPLE, and know you're getting the best.

1 XP® Gypsum Board

- For use in all rooms
- Anywhere mold and moisture is a concern
- Approved for walls and ceilings

2 SoundBreak® XP® Gypsum Board

- Rooms requiring sound control
